## SUMMARY

I am a software developer with more than three and half years' experience in the field. As a person, I am great at collaborating, working as a **team player** and a very **open-minded person**. Besides developing websites, I have experience on working with **UI/UX** teams for design, handling **SEO optimizations** and communicating with customers. I am currently residing in **Odense, Denmark**.

## SKILLS

- JavaScript, jQuery
- CSS and SASS
- Detail Oriented
- Problem solving (engineering)
- React, Redux
- Google Console and AWS
- Good communication
- Attention to detail

## EDUCATION

### Bachelor's Degree in Computer Engineering

Istanbul Technical University • 2016 – 2021

## WORK EXPERIENCE

### Hesehus A/S, Odense, Denmark

Frontend Developer • July 2022 - Present

- I am helping our customers to get better **SEO results**, have to them **user friendly** and **accessible** pages, **high quality** and **sustainable** software in technical development.
- By considering the budget and approach of customer and reality of project, I am helping them to **determine roadmap** for upcoming times, to **analyze the current problems**, to find **good solutions** for requirements for needs of both customers and the market.

### Orion Innovation, Istanbul, Turkey

Full stack Developer • December 2021 - July 2022

- I implemented **React Query** system that **improved the performance** +30% than Redux system that was built.
- I integrated **Google Cloud services** for both frontend (React) and backend (Node JS) projects. I also implemented ORM for database in one of the layers, and Firebase DB for another.
- I integrated bidirectional communication between multiple layers by using **Websocket**.

### Yapı Kredi Technology, Istanbul, Turkey

Full stack Developer • July 2021 - December 2021

- I was building intra webpages by using **React, Java, MySQL** technologies for the lawyers. I was also focusing on **user experience** and **accessibility** of the the page.
- I was constant communication with other teams for data exchange and preperation of the future tasks.
- By implementing **unit tests**, I helped the project got **90%** coverage.

### Ibtech, Gebze, Turkey

Jr Fullstack Developer • 02.2021 - 07.2021

- I created a new **Micro react Project** for a new requested feature. I also implemented **Redux** state system and **Swagger** to the project.
