- C# and .Net Core
- Adobe Photoshop CC
- English C1 Level

SUMMARY

I've always had an interest in computers since I was a kid. So I started working in a small computer store at the age of 12 during holidays. Then I continued to develop myself in this sector. I finally decided to study computer engineering to take a bigger step. Eventually, I got computer engineering degree from ITU. From this link, you can see more information about me and my sample projects.

EDUCATION
